

# Frames Data®

## Instant Frame Catalog For Optical Retail Websites

Integrate your e-commerce software with Frames Data to jumpstart your customers' success.

If you have an ecommerce software solution in the optical world, you already know that a significant barrier to pushing a site live is a lack of product data and imagery. Now, you can allow your clients to use Frames Data to populate their ecommerce sites, enabling you to launch sites faster and more profitably, while reducing the time you spend chasing accurate frame information.

### Here's how the model works:

Once you've completed development and been fully approved for deployment by Frames Data, your practices can subscribe to a Frames Data e-commerce product. They'll receive a username which will be authenticated inside your software, turning on access to Frames Data for use on their ecommerce site.

### STATS:

**600+ Brands**

**40,000+ Active Styles**

\*includes a quarter angle image for display

**Integration Fee: \$2500**
